DK LABEL DK TAPE

Desktop label printer

QL-600

Cost-effective label printing

The Brother QL-600 Label Printer offers an economical way to print paper or film labels. Great for home or home/small office use, create labels for file folders, envelopes, ID labels and more, or produce professional mailing and shipping labels, small signage and banners up to 3 feet long.

Automatic cutter | Up to 2.4" | Included | PC/Mac

Many different label sizes to choose from

Brother's unique continuous roll technology allows you to print any sized label you need from one roll. There are also many popular pre-sized die-cut labels available featuring rounded corners that are quick and easy to peel – ideal for when a larger number of labels need to be printed and applied.

Change label rolls quickly and easily

Unlike some other label printers on the market, all Brother DK label rolls are produced on a label spindle. All you have to do is drop in your roll, feed it into the printer then close the top cover. It takes just seconds and ensures the labels are installed correctly, every time.

Create labels in no time with the free P-touch Editor Software[1]

This software seamlessly integrates with Microsoft Office Applications such as Word, Excel and Outlook helping you quickly create custom labels with legible barcodes, images and logos using information stored on your computer. Choose from pre-installed label templates, built-in fonts, symbols and styles or make your own labels using a robust library of frames, fonts and images. Compatible with both Linux and Mac.
