

AirSHIM™ SLIM

INFLATABLE ELEVATOR DOOR SAFETY WEDGE

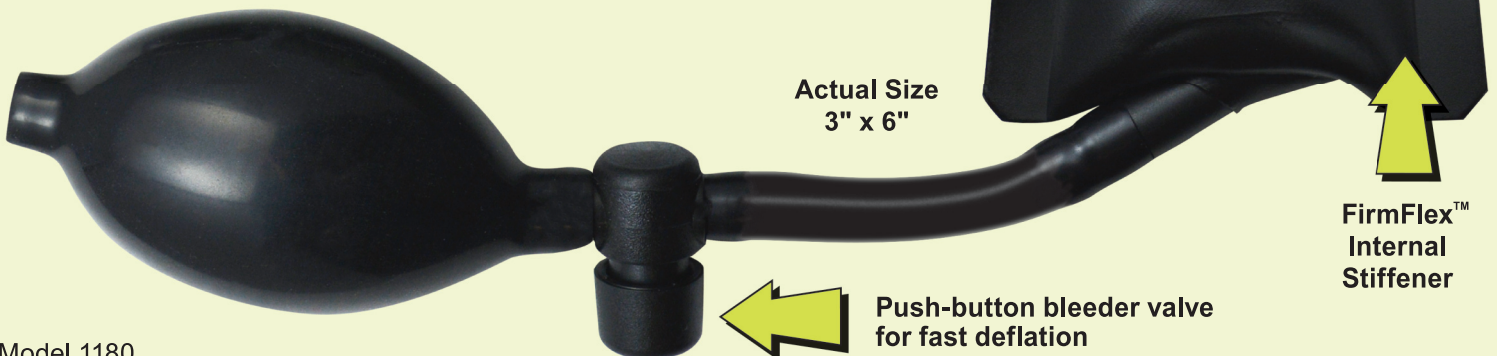

Introducing the New AirShim SLIM Inflatable Elevator Door Safety Wedge for Elevator Mechanics, Inspectors and other Professionals in the Vertical Transportation Industry!

With just a few quick squeezes, the infinitely adjustable AirShim SLIM will securely hold elevator doors open for all your repair, service and inspection work.

3 reasons you Must TRY the AirShim SLIM:

- 3** **Easier to Use** – No more bending and stooping to place a wedge – insert the SLIM belly-high between door and jamb, give it 2-3 pumps, done!
- 2** **Easier to Carry** – fits comfortably in shirt-pocket – small, soft, flexible rubber, not heavy-metal!
- 1** **Reduces Damage** – Soft material leaves no dings or scratches in costly elevator door surfaces

AIRSHIMTM SLIM

INFLATABLE ELEVATOR DOOR SAFETY WEDGE

Safety Managers — Give your team the *first* required door safety wedge that they will *actually* want to use!

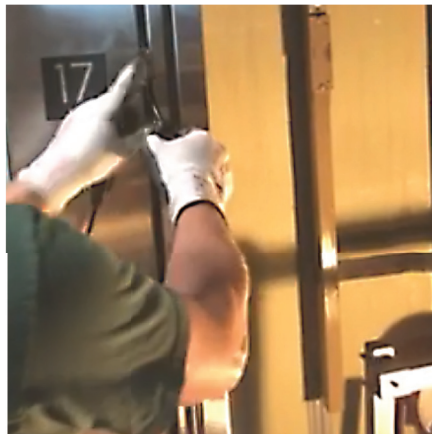

- *Inflatable wedge safely holds elevator doors open during routine maintenance, service calls and inspections as required in the Elevator Industry Field Employees Safety Handbook*
- *Easy one-hand operation using simple squeeze pump bulb and precise bleeder valve lets you secure the door at any height – why get on your knees if you don't have to?*
- *Increased safety, reduced liability! AirShim Slim is non-conductive and unlike heavy metal wedges, won't slip through the floor seal crack to fall and damage or injure cars or individuals below.*
- *Versatile and adjustable 1" gap spanning capacity – 3/32" to 1" range means you can hold open elevator doors with narrow or wide gaps, misalignments, dents or bends. All with the same tool!*
- *Light weight and flexible, it fits in shirt pocket or back pocket for convenience and comfort from one job to the next*
- *Narrow 3" x 6" pressure surface enables use in confined spaces while still providing stability when lifting or supporting narrow loads. Internal stiffener and rounded corner allows insertion into tight gaps.*
- *Contractor-grade inflatable air wedge works like an air jack that is ready for any lifting, aligning or pressuring task you have in the field up to 150 LB load rating.*

Specs:

Size: Bag is 3" x 6" x 3/32" deflated (1" fully inflated) • Max Load Capacity: 150 LB • Full One-Year Warranty

Small enough to fit in your shirt pocket.

Easily slide between the jam and the door and inflate.

No need to crouch to set wedges while holding doors with your feet.
