Portable Surface Roughness Tester Surftest SJ-210/310 Series

## **Portable Surface Roughness Tester**

# Surftest SJ-210/310 Series

## **Surftest SJ-210 Series**

The Surftest SJ-210 is a user-friendly surface roughness measurement instrument designed as a handheld tool that can be carried with you and used on-site.

## **Surftest SJ-310 Series**

The Surftest SJ-310 is a compact, portable, easy-to-use surface roughness measurement instrument equipped with extensive measurement and analysis features.

Refer to page 8 to 11 for details.

## Enhanced power for making measurements on site

Charging is reduced approximately one quarter of the time compared with conventional models. The detector supports a variety of measurement orientations and can perform measurements up against a wall surface or while facing upward. When combined with optional accessories such as a height gage adapter, the detector can perform measurements in various orientations and settings.

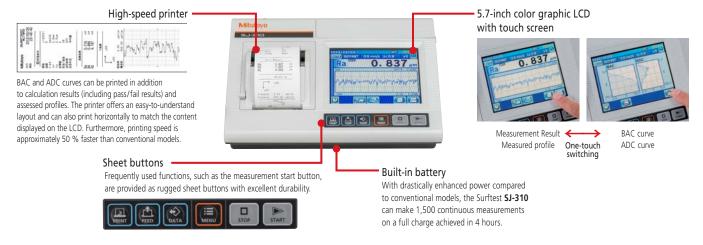

# Surftest SJ-310 Series

## User friendly, high-functionality display unit with integrated high-speed printer

The large 5.7-inch color graphic touch-screen LCD provides excellent readability. Furthermore, selecting icons from the touch panel display\* provides intuitive and easy operation. The integrated high-speed printer offers the user the ability to perform the entire measuring and printing process with the push of a single button (START button). \* Text display can also be selected.

## Highly functional detectors and drive units

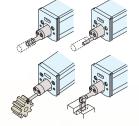

Detector supplied as standard

#### One of two types may be selected:

- · Measuring force: 0.75 mN Stylus tip: Tip radius 2 µm Tip angle 60°
- Measuring force: 4 mN Stylus tip: Tip radius 5 µm Tip angle 90°

A wide range of optional detectors is available, including detectors for small holes, extra small holes, gear tooth surfaces, and deep grooves.

#### Drive units

 Standard drive unit Popular standard drive unit

## Transverse tracing drive unit

Best suited for measurement of narrow, shrouded workpiece features such as crankshaft bearings, EDM parts, etc. (Patent Registered in Japan)

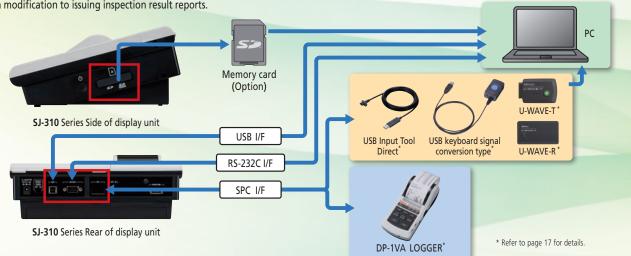

#### Retractable drive unit

The detector is in the retracted position at rest so it is immune from damage when inserted into a feature whose shape cannot be easily seen, such as a blind hole, etc.

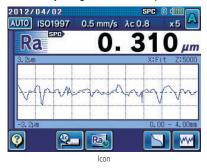

## Links to a wide variety of external instruments

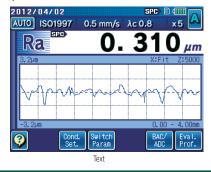

You can save parameter recalculations and measurement results in text format on a memory card and import into commercial spreadsheet software on a PC. You can also connect to a PC using the USB connector and use a dedicated software application to perform everything from measurement control and condition modification to issuing inspection result reports.

## Switches between icon and text display

The display can be switched between icon and text, providing easy, user-friendly operation. Additionally, the guidance feature provides detailed explanations of touch-screen buttons.

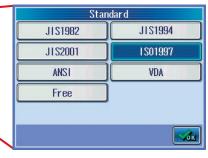

## Easy specification of assessment conditions from a list

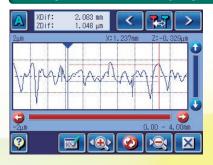

Setting assessment conditions is simple because you can select the desired condition from a displayed list (e.g., standard, parameter).

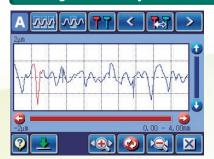

## Zooming waveforms and analyzing coordinate differences

You can not only magnify or shrink waveforms, but also calculate the coordinate difference between two points using a ruler operation. You can quickly check the irregularity status without waiting for a printout.

## **Deleting unnecessary data**

With the Surftest SJ-310, you can delete portions of measurement data. This feature allows you to make new calculations by deleting data that should not be included in parameter calculation, such as data on a scratch.

### Displaying GO/NG judgment results

By specifying a tolerance in advance, you can display pass/fail results in color.

#### Surface texture symbol entry

You can enter assessment conditions using ISO/JIS surface texture symbols.

(Patent registered in Japan, U.S.A., Germany, UK, France) (Patent pending in China)

## SJ-310 Series

### Measurement results can be displayed in several ways

Measurement results can be presented in the form of a 1-parameter, profile, 4-parameter or trace display.

1-parameter display: one parameter measurement result

Profile display: one parameter measurement result and the measured profile

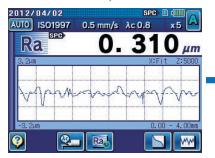

4-parameter display: multiple parameter measurement results

Trace display: the ten latest measurement results using the same parameter

#### **Recalculation function**

After completing measurement, you can modify the assessment conditions (standard, profile, and parameter) and easily recalculate the results using the \* Not possible with all measurement conditions.

### Dual assessment of a single measurement

Using the result of a single measurement, you can make calculations or analyze assessment profiles under two different assessment conditions (standard, profile, filter, etc.) without using the recalculation feature.

## Stylus alarm function

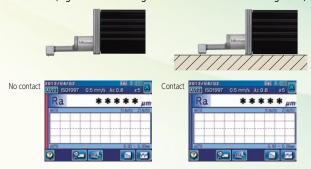

An alarm warns you when the cumulative measurement distance exceeds a preset limit. This feature can be used to prevent problems that would be caused by worn out styli. Any value can be specified as the limit.

## Positive stylus contact indication

Stylus contact with the workpiece is indicated by color coding in the display. This is helpful when visibility of the surface to be measured is restricted (e.g. when measuring within a shrouded feature or groove).

## **Extensive statistical processing features**

You can make a maximum of 300 statistical measurements using up to three parameters to obtain averages, standard deviations, maximums, minimums, passing rates, and histograms (upper and lower limits can be displayed). This feature is ideal for day-to-day data management.

# **Optional accessories for SJ-210/310 Series**

## **Drive unit accessories**

#### Nosepiece for flat surfaces

#### 12AAA217

Note 1: Standard accessory for the standard/ retractable drive unit of the SJ-310 Series Note 2: Not available for the transverse tracing drive unit.

## Nosepiece for cylindrical surfaces

#### **12AAA218**

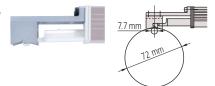

Note 1: Standard accessory for the standard/retractable drive unit of the SJ-310 Series Note 2: Not available for the transverse tracing drive unit.

#### V-type adapter

#### 12AAE644

Note 1: Transverse tracing type standard accessory.

Note 2: Dedicated to the transverse tracing drive unit.

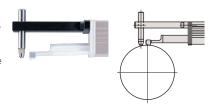

## Point-contact adapter

#### 12AAE643

Note 1: Transverse tracing type standard accessory.

Note 2: Dedicated to the transverse tracing drive

## Extension rod (50 mm)

#### Note: Only one rod can be used.

#### 12AAA210

#### Extension cable (1 m)

#### Note: Only one rod can be used.

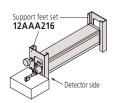

#### 12BAA303

Note: For connecting calculation display unit and drive unit.

#### Support feet set

### 12AAA216

Note 1: Standard accessory for the standard/ retractable drive unit of the SJ-310 Series Note 2: Not attachable to the detector side of the transverse tracing drive unit.

## Vertical positioning adapter

#### 12AAA219

Note: Not available for the transverse tracing drive unit.

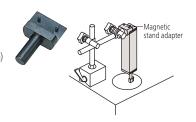

## Magnetic stand adapter

#### 12AAA221

(Mounting spigot diameter is 8 mm)

#### 12AAA220

(Mounting spigot diameter is 9.5 mm)

## Height gage adapter

12AAA222 (9 x 9mm) 12AAA233 (1/4 x 1/2")

# **Optional accessories for SJ-210/310 Series**

## **Setting attachments**

Note: Not available for the transverse tracing drive unit

Enhances measurement efficiency by facilitating the measurement setup of multiple workpieces of the same type and of the hard-to-access sections of a workpiece.

## Setting attachment: V type for measuring in the cylinder axis direction

The V-width is adjustable to the cylinder diameter facilitating axial measurement of a wide range of cylinder diameters.

Adjustable range: ø5 - ø150 mm

178-033

#### **Setting attachment: Slider type**

This attachment is ideal for measuring a flat area of a workpiece that has an indentation or step that makes it difficult to attach the drive unit.

178-034

## Setting attachment: Inside diameter type

Greatly facilitates measurement of internal wall surfaces of, for example, a cylinder block.

- Applicable diameter: ø75 ø95 mm
- Accessible depth: 30 135 mm

178-035

#### Custom-made for special order

Any specified attachment other than above listed can be custom-made for special order. Please consult your local Mitutoyo sales office.

Example: measurements for crankshaft, cylinder-block bores

## Calculation results input unit INPUT TOOL

This unit allows you to load Surftest SJ-210/310 Series calculation results (SPC output) into commercial spreadsheet software on a PC via a USB connector. You can essentially use a one-touch operation to enter the calculation results (values) into the cells in the spreadsheet software.

**USB Input Tool-Direct USB-ITN-D** 06AFM380D

**USB Input Tool** USB keyboard signal conversion type\* IT-016U 264-016-10

\* Requires the optional connection cable.

1 m: 936937

2 m: 965014

## Digimatic mini processor DP-1VA LOGGER

By connecting this printer to the Surftest SJ-210/310 Series' digimatic output, you can print\* calculation results, perform a variety of statistical analysis, draw a histogram or D chart, and also perform complicated operations for X-R control charts.

\* The symbol 'µm' is not printable, but measurement results can still be printed out without setting the measurement unit.

• SJ-210/310 Series → DP-1VA LOGGER Connecting cable

1 m: 936937 2 m: 965014

#### Roughness specimen W

Display:  $Ra = Approx. 3 \mu m$ , Approx. 0.4 µm

178-604

Note: Ra = Approx. 0.4 µm can only be used for stylus tip checking.

## **Measurement Data Wireless Communication System U-WAVE**

This unit allows you to remotely load Surftest SJ-210/310 Series calculation results (SPC output) into commercial spreadsheet software on a PC.

You can essentially use a one-touch operation to enter the calculation results (values) into the cells in the spreadsheet software.

U-WAVE-R (Connects to the PC) 02AZD810D

U-WAVE-T\* (Connects to the SJ-210/310 Series) 02AZD880G

\* Requires the optional connection cable. 02AZD790D

Example of the connection with SJ-210

## **Foot switch**

A foot switch is used to trigger measurement. This tool is very useful in cases where you need to measure the same workpiece multiple times using jigs and other fixtures.

## Memory card (2GB / 8GB)

#### 12AAW452 / 64PMI244

Note 1: micro SD card (with a conversion adapter to SD card)

Note 2: Not all memory cards can be recognized. Please use the optional SD memory card.

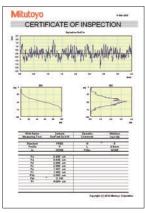

## **Optional accessories for SJ-210/310 Series**

## Simplified communication program for SURFTEST SJ-210/310 Series

The Surftest \$J-210/310 Series has a USB interface, enabling setting up measurement conditions and starting the measurement via PC. We also provide a program that allows you to create inspection record tables using a Microsoft Excel\* macro.

Required environment\*:

- OS: Windows 7 Windows 8 Windows 10
- Spreadsheet software: Microsoft Excel 2010 Microsoft Excel 2013 Microsoft Excel 2016
- \* Windows OS and Microsoft Excel are products of Microsoft Corporation.

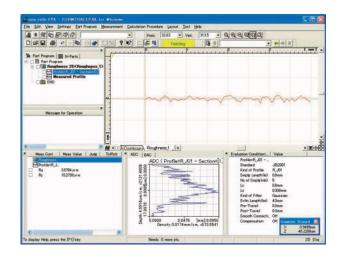

The optional USB cable is also required.

- USB cable for SJ-210 Series (2 m) 12AAL068
- USB cable for SJ-310 Series 12AAD510

Note: USB Communication cable (commercial item: Equivalent to A and mini-B type for device-host A)

## Contour/Roughness analysis software FORMTRACEPAK-AP

More advanced analysis can be performed by loading SJ-210/310 Series measurement data to software program FORMTRACEPAK-AP via a memory card (option) for processing back at base.

Refer to the FORMTRACEPAK Bulletin No. 2010(2) for more details.

# **Optional Accessories**

## For SJ-210 Series

• Printer for SJ-210

Assessed profiles, calculation results and curves can be printed out by connecting the SJ-210-dedicated printer, which is palm sized (WxDxH: 93×125×70 mm) and can run on an internal battery.

- Power supply can be selected. (AC adapter or battery pack)
- Printable items: Measurement conditions, calculation results, assessed profile, bearing area curve (BAC), amplitude distribution curve (ADC), and environment settings.

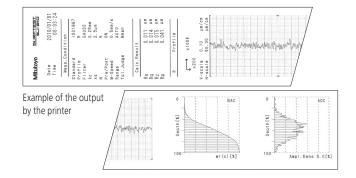

178-421A

 Optional accessories and consumables for SJ-210 Protective sheet for the color LCD (5-sheet set) 12AAL066 Connecting cable (for SJ-210 Series) 12AAL067

#### Unit configuration:

- 1) Printer main unit 1 unit
- 2) Printer connecting cable (For the connection to the SJ-210)
- 3) Printing paper 6 rolls
- 4) Battery pack 1 piece
- 5) Exclusive use AC adaptor (with AC power cord) 1 piece

#### Printer supplies:

Printing paper standard type (5 rolls) 270732 Durable printer paper (5 rolls) 12AAA876

## For SJ-310 Series

Optional accessories and consumables for SJ-310

Printer paper standard type (5 rolls) 270732 Durable printer paper (5 rolls) 12AAA876 Touch-screen protector sheet (10 sheets) 12AAN040 Connecting cable (for SJ-310 Series) 12AAA882

### Whatever your challenges are, Mitutoyo supports you from start to finish.

Mitutoyo is not only a manufacturer of top quality measuring products but one that also offers qualified support for the lifetime of the equipment, backed by comprehensive services that ensure your staff can make the very best use of the investment.

Apart from the basics of calibration and repair, Mitutoyo offers product and metrology training, as well as IT support for the sophisticated software used in modern measuring technology. We can also design, build, test and deliver measuring solutions and even, if deemed cost-effective, take your critical measurement challenges in-house on a sub-contract
