FEATURES

- **Comfortable:** wrist-worn and lightweight
- **Convenient:** continuity probe assists with performing testing in hard-to-reach areas
- **Efficient:** performs significantly faster than a ground resistance type meter
- **Accurate:** automatic polarity reversal (*applies current + to - then - to + for more accurate results*)
- **Lead compensation** for accurate measurements
- **Constant operation:** continuously measures — no need to press a button to start or stop a test
- Commissioning or troubleshooting bonded non-current carrying conductive pathways to ground
- Checking connections over long distances
- **Compatible with AEMC Instruments ground testing accessories** (*instrument will work with our reel kits*)

APPLICATIONS

Test continuity on:

- EGC (*equipment ground conductors*)
- Swimming pool grounds
- Lightning conductors
- GEC (*ground electrode conductors*)
- Isolated ground conductors
- Electrical cabinets
- Motors
- Building steel
- Light fixtures
- Data centers
- Solar racks
- Windmill blades

Applicable industries:

- Lightning Protection
- Traffic management
- Data centers communications
- Solar/renewable energy
- MSHA (*Mining and general contractors*)
- Static ground for hazardous materials (*paint shops, chemical processing*)
- Utility (*construction for commissioning ground integrity for substations*)
