TEK-BAR 3120B

Smart Gauge Pressure Transmitter

PRESSURE

Introduction

Tek-Bar 3120B Smart Gauge Pressure Transmitter uses the world's advance silicon pressure sensor technology and state of the art encapsulation technology. This is a high performance pressure transmitter with HART communication protocol and is used to measure gauge pressure. It is used to measure liquid, gas, or steam flow as well as liquid level and density of medium. It has a high accuracy of up to 0.075% of URL and has IP66 water-proof protection.

Measuring Principle

The Tek-Bar 3120B works on the principle of mono silicon technology. The pressure sensor of the transmitter is located on the top of the metal body, away from the service fluid. This enables mechanical and thermal isolation of the sensor from the fluid in service.

When pressure is applied on the diaphragm and the silicon piezoelectric sensor, they become stressed and undergo a change in voltage resistance. This change in resistance is directly proportional to the applied pressure, which is transferred to the transmitter body using lead wires.

Built on semiconductor technology, the resistance change (piezoelectric effect) is notably higher than exhibited in standard strain gauges. Therefore, the sensitivity of mono-crystalline sensors is higher than the sensitivity of most other types.

Benefits

- Digital communication HART protocol
- High accuracy up to $\pm 0.075\%$
- Various Output: 4-20 mA, digital signals with HART® Communication (Modbus RS485)
- Multiple temperature and linearity compensation to improve accuracy
- Fully-sealed and fully isolated silicon pressure sensor
- Superior stainless steel process flange
- Dual diaphragm overload protection, can easily cope with overload tests
- 355° rotation display module

Applications

- Water and Waste Water Industry
- Pulp and Paper Industry
- Food Processing Industry

Specifications

Pressure Type	Gauge pressure
Accuracy	±0.075% F.S.
Diaphragm Materials	Hastelloy C
Measuring Range	5 to 10000psig
Stability	±0.2 % URL/5 year
Process Connection	±0.075% F.S.
Wetted material	316 LLS and Hastelloy C
Working Humidity	5 to 100%
Output Signal	4 mA to 20 mA with HART® Communication (Optional Modbus RS485)
Mounting Position Effect	Apply to any position. Max value lower than 1.6 w.c. (400 Pa) can be corrected by zero clearing function
Insulation Resistance	≥20 M Ω at 100VDC
Process Connection	¼" NPT Female
Enclosure Rating	NEMA 4X (IP66)
Weight (excluding Option Items)	3.43 lb (1.55kg)
Testing Standard	IEC60770
Agency Approval	CE, CSA Class I Div I

Damping Time

Damping time of amplifier	0-100 s adjustable
Diaphragm capsule (isolated diaphragm and silicon oil filling) damping time	≤0.2 s
Start-up after power off	≤6 s
Normal services after data recovery	≤31 s

Environmental Conditions

Working temperature	-40 °F to 180 °F (-40 °C to 82 °C)
Storage temperature	-40 °F to 230 °F (-40 °C to 110 °C)
Media temperature	Silicon oil filling: -40 °F to 248 °F (-40 °C to 120 °C)
Working humidity	5-100% RH at 104 °F
Protection class	IP66

Power Supply

Standard/flame proof	10.5-55 VDC
HART protocol	16.5-55 VDC, communication load resistance 250 Ω
Load resistance	0-2119 Ω for working condition, 250- 600 Ω for HART protocol
Transmission distance	<1000 m
Power consumption	≤500 mW at 24 VDC, 20.8 mA

Measuring Range and Limit

Nominal Value	Smallest Calibrated Span	Lower Range Limit (LRL)	Upper Range Limit (URL)	Overload Limit
5psi	8 in.WC	-14.5psi	5psi	145psig
36psi	2psi	-14.5psi	36psi	580psig
145psi	7.25psi	-14.5psi	145psi	870psig
435psi	22.25psi	-14.5psi	435psi	2175psig
1500psi	72.5psi	-14.5psi	1500psi	2900psig
3000psi	725psi	0psi	3000psi	11600psig
6000psi	725psi	0psi	6000psi	11600psig
10000psi	5000psi	0psi	10000psi	16000psig

Installation

Mounting in liquid applications

- Place taps to the side of the line.
- Mount beside or below the taps.
- Mount the transmitter so the drain/vent valves are oriented upward.

Mounting in gas applications

- Place taps in the top or side of the line
- Mount beside or above the taps

Mounting in steam applications

- Place taps to the side of the line.
- Mount beside or below the taps.
- Fill impulse lines with water.

Customer Service & Support

Tek-Trol is a fully owned subsidiary of TEKMATIION LLC. We offer our customers a comprehensive range of products and solutions for process, power and oil & gas industries. Tek-Trol provides process measurement and control products for Flow, Level, Temperature & Pressure measurement, Control valves & Analyzer systems. We are present in 15 locations globally and are known for our knowledge, innovative solutions, reliable products and global presence.

TEK-TROL LLC reserves the right to change the designs and/or materials of its products without notice. The contents of this publication are the property of TEK-TROL LLC without written permission. All rights reserved. Copyright © 2020 TEK-TROL LLC
