TKO™ CARBIDE-TIPPED HOLE CUTTERS

IDEAL Electrical's line of TKO™ Carbide-Tipped Hole Cutters offer the most efficient and clean cutter replacement for traditional knockouts, by making smooth holes in a fraction of the time at a fraction of the cost. Specifically designed to cut sheet metal, IDEAL TKO™ cutters will even cut stainless steel with their precision engineered ground carbide tips.

The innovative design includes the exclusive SmoothStart™ replaceable pilot drill, which guides the cutter to the surface, avoiding cutter damage and providing smoother holes. With an integral over-drill flange the IDEAL TKO™ prevents cutter penetration beyond the sheet metal. When it comes to quality, performance and durability, IDEAL is the professional's choice for carbide-tipped hole cutters.

Quickly drills precise holes without penetration beyond sheet metal.

IDEAL TKO™ provides smoother, more precise hole than competitors' (holes cut with 1-1/8 in. cutters)

Exclusive SmoothStart™ pilot drill guides cutter to prevent damage to cutter head.

Integrated over-drill flange prevents penetration beyond the sheet metal.
