

LEVEL

Two Wire Ultrasonic Level Transmitter With Display

TEK-Sound 4200B

1 FEATURES

- The advanced microprocessor and unique Echo Discovery echo processing technology, the ultrasonic level instruments can be used under various complex conditions.
- The false echo storage function assures that the instrument can detect the right echo even with the presence of multiple false echoes and present accurate measurement results eventually.
- Ultrasonic transducer has adopted patented sonic matching technology, which helps it strengthen its emission power, enhance the signal intensity and eventually achieve accurate measurement.
- The built-in temperature sensor inside the transducer can complete temperature compensation for measurement results.

3 APPLICATIONS

- Water and Wastewater industry
- Pharmaceutical industry
