

# VerifEye™ Mini Meter™ Multiple Meter Unit (MMU) Kits

## DEFINITION

VerifEye™ Mini Meter™ (kWh) Multiple Meter Units (MMUs) Kits offer immediate, off-the-shelf installation and easy specification for multi-tenant submetering applications. The MMUs are designed to meter multiple single phase (120/208/240V) loads originating from a single, high density distribution panel.

MMUs have important advantages over multiple individually housed meters including:

- Smaller total mounting footprint
- Reduced hardware requirements (conduit, wire, short circuit protection devices, etc.)
- Reduced installation time
- Individual meters in one enclosure architecture enhances product reliability

Each VerifEye Mini Meter installed in an MMU is a revenue-grade, ANSI C12.1-compliant energy meter that is backed by Leviton's best in the industry 5-year warranty. Mini Meter MMU Kits are NEMA 4X rated and UL listed, suitable for either indoor or outdoor installations.

Each Mini Meter MMU has built-in pulse outputs for connection to Automatic Meter Reading equipment as well as on-site kWh displays.

Suitable for both new construction and retrofit applications, Mini Meter (kWh) MMUs are available in 3 sizes:

- **Medium:** Houses 2 to 4 Mini Meters
- **Large:** Houses 5 to 7 Mini Meters
- **Extra-Large:** Houses 9 to 18 Mini Meters

## FEATURES

- No configuration form required
- Kitted with CTs for revenue grade metering
- Includes DIN Rail hardware to mount VerifEye HD Pulse module for AMR system integration
