The disposable **Bio Plas Astral® Inoculation System** is color coded and consists of the following; 1 uL yellow Astral Loop, 10 uL blue Astral Loop and white Astral Streaking Needle. During manufacturing, these Astral Loops are inserted into racks which have 96 individual tubular chambers. When the 96 chambers are filled with the Astral Loops they are then hermetically sealed with a thin foil membrane. A dust cover is placed over this 96 chamber rack, heat shrunk and sterilized by electron beam. Additionally all Astral Loops are certified to be free of RNase, DNase, DNA, pyrogens and PCR inhibitors.

The handle is designed to be used with one hand and will easily puncture the membrane attaching itself to the hub of the Astral Loop. It may then be withdrawn from its individual sterile chamber ready to be used for inoculation or streaking. When the inoculation or streaking process is complete, the Astral Loop or Astral Streaking Needle may then be ejected off the Astral Handle.

This easy to use and ruggedly designed Astral Handle may be autoclaved repeatedly, without damage to the handle.

STEP I

Tip of the Astral Handle pierces and penetrates sealing film

STEP II

Astral Handle locks onto Astral Loop or Astral Streaking Needle

STEP III

Astral Handle withdrawing sterile Astral Loop or Astral Streaking Needle

Every case of 10 96-rack package is supplied with a free Astral Handle.

This illustration shows the three easy and rapid steps used to extract a sterilized 10uL Astral Loop from its sealed chamber.

Procedures: All Astral Loops may be used in quantitative procedures such as sampling, urine counts, serial dilutions, and bacteriological inoculation

1uL Astral Inoculating Loop

Catalog Number 7000

SAFETY: Astral Loops eliminate the metal or wire loop flaming step and the hazards of spattering, cross-contamination, and the risk of infectious pathogens caused as a result of aerosols, and the hazards of open flame.

CONVENIENCE: All Astral Loops may be quickly extracted from the sterilized rack by using the Astral Handle. These Astral Loops are flexible enough to facilitate streaking but rigid enough to penetrate the media for inoculation.

TIME SAVINGS: The Astral Inoculation System allows the technologist to inoculate prepared plates at an extremely rapid rate in any laboratory setting or condition, i.e., anaerobic chambers, fume hoods, satellite labs or, in the field.

ECONOMY: The savings can be substantial; fewer plates used, guaranteed sterility and cleanliness, zero cross-contamination and speed of use
