

855GX IntelliBender®

SAVE MONEY WITH EVERY BEND.

SIMPLE.

ORIENT SHOES

SELECT ANGLE(S)

BEND

4X FASTER SETUP!*

PRODUCTIVE.

- Change from Rigid/IMC to EMT in under 1 minute
- Conduit sensor automatically detects size of conduit
- One-button program for standard bends
- Calculate marks for complex bends in under 1 minute

ACCURATE.

- Absolute encoder stops bends at exact angles, and accommodates for conduit spring back
- Digital pendant gives accurate feedback
- Save, repeat and export bends via USB port

Type of Conduit	Cost reduction after 100 pieces saved*
2" Rigid	\$4382.80
2" EMT	\$1674.00

RELIABLE.

- Rugged construction withstands the demands of the jobsite
- Solid-state electronics rated for over 1,000,000 bends, so you can keep saving time, conduit, and money.

* Claims based on list price of 10' long EMT and Rigid conduit. Speed claims based on timed 4-bend saddle comparisons between the 855GX, Gardner Bender B2000, and other similar benders.

QUICK SETUP.

Sensors automatically detect conduit size for fast setup.

COMPLETE CONTROL.

Digital pendant provides accurate bend progress feedback.

ACCURATE.

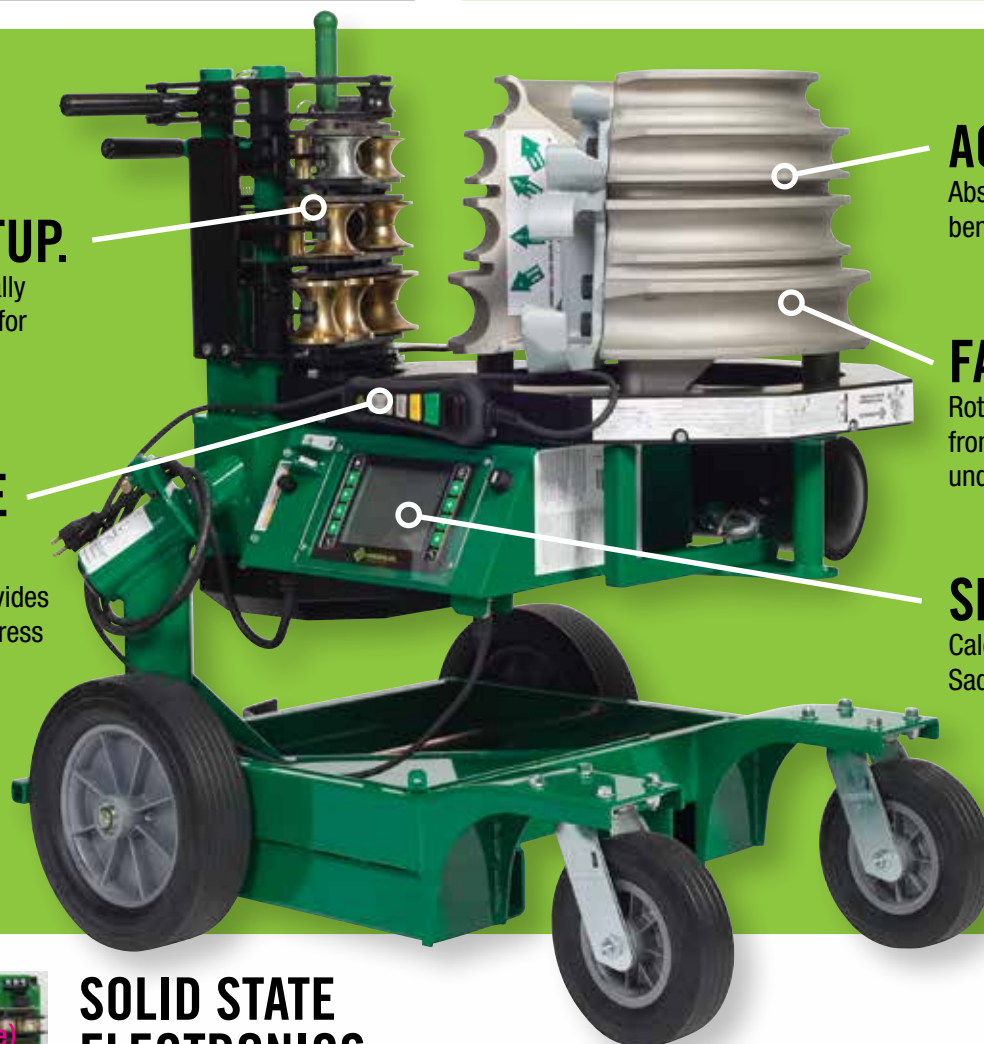

Absolute encoder stops bending at precise angles.

FASTER.

Rotate shoe to change from Rigid/IMC to EMT in under 1 minute.

SMARTER.

Calculate U-Bends and Saddles in under 1 minute.

SOLID STATE ELECTRONICS.

System eliminates risk of arc flashes and increases machine life.
