

New!

Models 100A, 150A & 200A Threading Machine Stands

Introducing the biggest thing to hit threading machine stands since the wheel!

Ridge Tool is pleased to present the new Steel Equipment Cabinet designed specifically for the #200A machine stands. The new stand not only boasts increased storage volume to allow several die heads or even your 700 Power Drive, but we've added two (2) internal shelves to keep your tools and dies separated and within easy reach. In addition, a large external steel shelf was added for oil jugs, or more tools.

The cabinet itself utilizes a large bi-fold door to ensure maximum visibility and easy access to all your stored die heads and tools. Also, there are two (2) cut-outs so that the foot switch and power cord can be secured inside the box during transportation, or to prevent unauthorized usage. In addition, a large industrial steel clasp was added so that the cabinet can be securely pad locked.

Cabinet Features:

- 17 gauge steel walls & welded construction
- 2 internal & 1 external storage shelves
- Oversized bi-fold door with steel clasp
- Cut-outs for power cord and foot switch storage
- 2 drain plugs for easy cleaning
