

FK31-SL Calibration Bath

The calibration baths in this category feature an integrated refrigeration unit and are suitable for calibration applications to -30 °C. The bath cover with openings and Viton® sleeves is already included in delivery for all models.

Your advantages

- VFD COMFORT DISPLAY
- LCD DIALOG DISPLAY backlit for convenient interactive operation
- · Keypad for setpoints, warning/safety values and menu functions
- ICC (Intelligent Cascade Control), self-optimizing temperature control
- TCF Temperature Control Features to optimize the control behavior
- ATC3 3-Point-Calibration
- Pt100 External sensor connection for measurement and control
- SMART PUMP, electronically adjustable pump stages
- · Adjustable high temperature cut-out, visible via display
- Integrated programmer for 6 x 60 program steps
- Highest temperature stability to ±0.005 °C (±0.02 °C at +200 °C)
- Temperature uniformity better than ±0.01 °C
- Optional Pt100 sensor for reference temperature measurements
- Temperature chamber with overflow at maximum liquid level
- · Active Cooling Control

Technical data

Available volta	ge versions	Bath	Bath		
Order No.	9 352 628	Bath tank	Stainless steel

All Benefits

JULABO. Quality.

Highest standards of quality for a long product

Green technology.

Development consistently applied environmentally friendly materials and technologies.

Satisfied customers.

11 subsidiaries and more than 100 partners worldwide guarantee fast and qualified JULABO support.

100% Checked.

100% testing. 100% quality. Each JULABO Circulator undergoes thorough quality testing before leaving the factory.

Quick start.

Individual JULABO consultation and comprehensive manuals at your disposal.

Services 24/7.

Around the clock availability. You can find suitable accessories, data sheets, manuals.

Connection of additional equipment

Stakei connections for solenoid valve, HSP booster pump and HST booster heater

Early warning system for high/low temperature limits

Maximum safety for applications, optical and audible alarm, convertible to automated cut-off function

Clever pump system

Reliable and consistent pump capacity, electronically adjustable pump stages

Control from the external application

External Pt100 sensor connection for precise measurement and control directly in the external application

For flammable bath fluid

Classification III (FL) according to DIN 12876-1

ATC3. Calibration.

'Absolute Temperature Calibration' for compensating a physically caused temperature difference, 3-point calibration.

Process. Under control.

Full regulation of the dynamics control, access to all important control parameters for individual process optimization.

100 % Cooling capacity

'Active Cooling Control' for cooling available throughout the entire working temperature range, fast cool-down even at higher temperatures

Energy saving cooling

Proportional cooling control for automatic adjustment of cooling power or temporary switch-off of compressor as needed to save up to 90 % energy in comparison to unregulated

Condensation and ice protection

A heated cover plate prevents condensation or ice build-up in the bath

cooling machines
