

PB1

Magnetic Powder Blower

The PB-1 Hand-held Controlled Magnetic Powder Blower provides reliable and controlled application of magnetic inspection powder to areas previously inaccessible – horizontal, vertical and overhead.

The image to the left shows the artwork printed on the front of the PB1 Bottle. Make note of the fill line when filling the bottle with powder. The powder should not exceed this line.

Powder Application

Down

Hold blower with head name plate and screen holes up and horizontal. Tilt blower approximately 20° and float powder across work.

Overhead and Vertical Surfaces

Blower must be tipped down to accumulate powder in head for each application.

Powder Control

Adjust powder control when changing from down to overhead or vertical work.
