Safety Certification

All Amprobe tools, including the Amprobe AMP-25, are rigorously tested for safety, accuracy, reliability, and ruggedness in our state-of-the-art test lab. In addition, Amprobe products that measure electricity are listed by a 3rd party safety lab, either UL or CSA. This system assures that Amprobe products meet or exceed safety regulations and will perform in a tough, professional environment for many years to come.

AMP-25 Applications

Troubleshoot electrical systems and measure AC/DC load current on exposed wires in a breaker panel.

Utilize the inrush current function for motor start-up monitoring.

The non-contact voltage (NCV) function checks for voltage presence.

Pocket-sized for quick and easy spot checks of electrical systems.
