

AIRSCOUT MOBILITY

PARAMETER LISTS

PARAMETERS SUPPORTED BY AirScout Mobility

Document version 4

This document includes **three sets** of parameter lists: Parameters support by Mobility Plus with **Qualcomm chipset** including parameters supported by Mobility, Parameters supported by Mobility with **HiSilicon chipset**, and Parameters supported by TETRA.

Parameters supported by Mobility are applicable to all Android devices regardless of the chipset and may vary due to vendor implementation.

TETRA is controlled via Mobility Plus tablet tool and the parameters on TETRA's list are defined by TETRA's capabilities.
