

CK24M

Pipe clamp probe

Features

- Clamp probe for pipe temperatures
- Measures temperature of pipe 0.25 to 1.5" inch in diameter accurately
- Use with any K-type thermocouple tester with sub-mini input
- Hands free; saves time
- More accurate than non-mechanical connections on round surfaces

Specifications

Temp. Range: -40° to 250°F (-40° to 121°C)

Dimensions: Max jaw opening: 1.5" / Nominal jaw opening: 0.25"

Lead Length: 39.4" (1M)

Insulation Material: Polyurethane

Connector Type: Sub-mini
