

ELECTRO STATIC PRECIPITATOR

The Electro Static Precipitator Grounding Tool is designed to safely remove the static charge after de-energizing for service work.

Electro Static Precipitator Tool includes:

- Brass alloy U-shaped hook to engage precipitator plates
- 4' x 1-1/4" fiberglass installation pole
- 6' of No. 2 Str. Extra flexible copper grounding cable with durable bright yellow neoprene jacket.
- Aluminum alloy T-handle flat face ground clamp can be attached to flat, round and square hardware. Serrated jaws have 1-1/2" maximum capacity.

Cementex Part Number	Description	Weight
