

DFX II Series

Digital Force Gauge

Functions and Features

Simple Operation

User friendly four button operation for; Peak, Units, Zero and Info.

PEAK- change from Normal to Peak mode
UNITS- select desired units of measurement
ZERO- used to zero or tare
INFO- for gauge setup and status reviews

Battery Operated with Automatic Shutoff Power Saver

The gauge has power saving feature that automatically turns off the gauge when no keys are pressed. This saves the battery life and gives up 70 to 100 hours of continuous use with the rechargeable NiMH battery pack.

The charger comes with Universal adapters for Worldwide usage from 100 to 240 volts.

Wide assortment of accessories

The gauge has either #10-32 or 5/16-18 male threads depending on the gauge capacity. As standard the gauge is supplied with Flat adapter and Hook. A wide assortment of optional accessories are available.

DFX II Series

The DFX II Series is an economical digital force gauge ideal for applications where users are interested in basic peak force measurement.

The DFX II is available in four capacities (10 lbf, 50 lbf, 100 lbf, 200 lbf) and features an integral loadcell with a measurement accuracy of better than 0.3% full scale.

The DFX II Series operates using a rechargeable NiMH battery pack and can operate using the supplied universal charger as well. Under battery operation, the DFX II Series will operate for 70 to 100 hours of continuous use.

A large, easy-to-read, high resolution dot matrix LCD display supports a variety of standard gauge functions including normal and peak readings. Loads are displayed in ozf, gf, lbf, kgf and N units. The display language may be setup to indicate in English, Spanish, French, German, Portuguese and Chinese. The DFX II Series' calibration procedure is included in the gauge's setup.

Expect more...

Battery Status

View the current battery power remaining on your rechargeable battery pack.

Normal Display

Shows the current load being applied to the sensor. Indicates load direction.

Peak Display

Shows the peak (maximum) force that was applied during the test.

Overload Display

Shows the overload history for the force gauge. Indicates the number of overloads that occurred in both the tension and compression direction.

Load Bargraph

Shows the load in real time being applied to the internal sensor graphically. Indicates overload conditions and zero offset.

Rugged Construction

Cast aluminum housing and integral mechanical overload protection are designed into the DFX.

Units Lock

Select the desired units of measurement. Units may be "locked" to your desired measurement type: ozf, gf, lbf, kgf or N.

Load Direction Indicator

Shows the direction of load being applied in Tension and Compression

Language Setup

Let's you select the desired display language for your DFX. Information may be displayed in English, Spanish, French, German, Portuguese and Chinese.

Configuration Setup

Let's you validate or calibrate your DFX. The calibration procedure is included in the gauge setup. Just follow the step-by-step prompts.

Dimensions and Specifications

Specifications	
Accuracy	±0.3% of Full Scale
Certification	Certificate of Conformance(std.)
Data Sampling Rate	1000 Hz
Peak Capture Rate	1000 Hz
Display Update Rate	250mS
Tare Capacity	110% full scale
Overload Protection	150% full scale
Display Characteristics	High resolution, dot-matrix, 8 lines, 21 characters
Automatic Shutoff	30 minutes. May be disabled
Power	NIMH battery pack or Universal Battery Charger
Battery Life	Approx. 70-100 hours
Instrument Weight	1,5 lbs (0.7 kg)
Shipping Weight	4 lbs (1.8 kg) with accessories
Warranty	1 year
Storage Temperature	0 to 130°F
Operating Temperature	40 to 110 °F
Temperature Stability	Better than 0.03% of rated output per °F
Relative Humidity	20% to 85%

Conformance

The DFX Series has been assessed against the essential health and safety requirements of the Low Voltage and the EMC Directives listed and found to be in compliance.

BS EN 61010-1:2001	Safety Requirement for Electrical Equipment
BS EN 61000-6-3:2001	EMC Generic Emission Standard
BS EN 61000-6-1:2001	EMC Generic Immunity Standard

Loadcell Deflection Specifications

Specified loadcell deflection values at full capacity.

Capacity	Deflection
10 lbf (50N)	0.010" ±0.004"
50 lbf (250N)	0.010" ±0.004"
100 lbf (500N)	0.010" ±0.004"
200 lbf (1000N)	0.010" ±0.004"
