HIGH PRESSURE RELIEF VALVE 1/8" - 3/4" NPT 10-2400 Psig

Description

The HPRV Series High Pressure Relief Valve provides accurate crack pressure with zero leakage up to 98% of set pressure. When properly specified, this factory preset, tamper proof design is ideally suited for most liquid and gas applications. Encapsulating the o-ring seal within the poppet prevents seal extrusion and cold flow. A precise line of contact seal is maintained by guiding the poppet in the body. At high crack pressure settings, the o-ring is protected by a metal-to-metal stop between the poppet and the body. The valve's high flow design, combined with narrow band interchangeable springs, minimizes system pressure rise as flow demand increases. Series HPRV valves are available in brass or stainless steel and inline or discharge to atmosphere configurations. They can also be supplied with a manual pull ring override and cleaned for oxygen service.

Features

- 100% Factory Preset and Tested
- Zero Leakage to 95-98% of Set Pressure
- **Tamper Proof Adjustment**
- **Excellent Reseat Performance**

Technical Data

- Set Pressure Range: 10 to 2400 Psig (0.7 to 166 Bar)
- Set Pressure: Factory Preset +/-5% on increasing pressure
- Reseat: 90%-95% of Actual Crack Pressure

Leakage Allowance Specifications for Valves with PTFE Seal Option:

Pressure	Leak Rate up	Reseal	Max Leak @
Range	to 90% Crack	Pressure	Reseal Pressure
10-100 PSI	< 15 SCCM	50% of Crack	15 SCCM Max
100.1+ PSI	< 5 SCCM	80% of Crack	5 SCCM Max

* all allowable leakage rates specified in N2 gas.

Inline Valves (Series HPRV):

Proof Pressure: 3700 Psig (225 Bar) Burst Pressure: >5000 Psig (345 Bar)

Temperature Range: -320° F to 400° F (-220° C to 204° C) Based on seal selection, see ordering information

PROPER COMPONENT SELECTION – When specifying a component, the total system design must be considered to ensure safe and trouble-free performance. Intended component function, materials compatibility, pressure ratings, installation, environment and maintenance are the responsibility of the system designer.
