

5 mL/15 mL/17mm and 10-17mm Tube Racks

Rotate with ease to accommodate your needs

With bench top space at a premium, it's important for research and clinical labs working across a range of applications to efficiently use the space available. Unlike other tube racks, these multi-purpose racks are specifically designed with the flexibility to hold multiple tube sizes firmly in place to assist technicians constantly alternating between sample vessels.

The rack incorporates two moving hinged shelves that can be rotated to an up or down position to accommodate the size of the tube being used. When working with samples, the shelves can be rotated to an angled position to facilitate more comfortable pipetting and allow better visibility. The tube rack wells have a unique teardrop design that enables easier insertion and better retention of tubes over traditional designs.

- Made of polypropylene
- Autoclavable
- Patent No. US 9,776,188

Shelves Can Be Rotated
to an angled position to facilitate more comfortable pipetting and allow better visibility

Unique Well Design

Tear drop shape allows for better retention of tubes

Embossed Index Numbers
for quick sample ID and retrieval
