

## ExStik® Flat Surface Electrodes

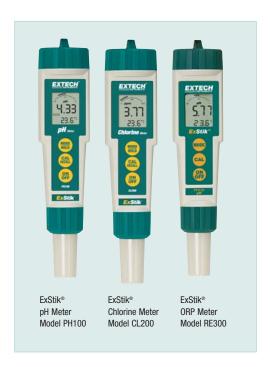

Rugged, flat surface electrode provides "On-the-Spot" measurements with an ExStik® meter

Ideal for direct contact applications such as food, paper, cement and wet surface

## **Features:**

- Flat surface electrode allows "On-the-Spot" measurements whether the sample is liquid, semi-solid or solid
- Chlorine and pH electrodes have built-in temperature sensor
- Chlorine electrode does not require a reference solution and also does not have a shelf life
- Flat surface design provides a rigid structure that is difficult to damage, but easy to clean

## ExStik® pH, Chlorine, and ORP Electrodes are to be used with ExStik® meters only

## **Ordering Information:**

PH105	pH ExStik® Electrode Module
	Chlorine ExStik® Electrode Module
<b>RE305</b>	ORP ExStik® Electrode Module
PH115	Refillable pH ExStik® Electrode Module
PH113	Reference Refilling Solution Kit for PH115
<b>CL200</b>	ExStik™ Chlorine Meter
<b>RE300</b>	ExStik™ ORP Meter
<b>CL203</b>	Reagent tablets (10pk - 100 tests)
<b>EX006</b>	Weighted base with 5 solution cups
EX007	Spare sample solution cups (24pk)
PH103	Tripak buffers (6ea. of 4, 7, 10pH & 2 Rinsing solutions)
