RoofSnake™

by PacTool International

Made in America

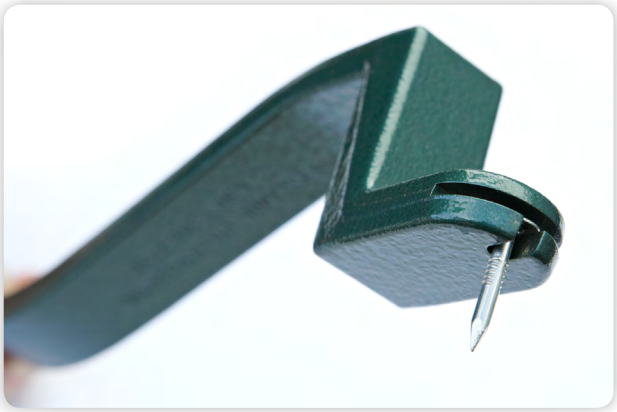

Your New Best Friend for Shingle Replacement

The Roof Snake makes replacing composition shingles much easier and accurate than traditional methods. It also helps prevent damage to existing shingles.

With its patented offset nail-slot feature, the Roof Snake helps you align roofing nails with the proper one-inch offset from the bottom-edge of your existing course. It also lets you install new shingles without over-bending or striking surrounding shingles (or fingers) with your hammer.

Add the roof snake to your tool collection and make composition shingle replacement a whole lot easier!

- ***Replace shingles easily and accurately***
- ***Nail-slot feature ensures proper 1" offset***
- ***Nail-pulling end replaces flat bar***

SMART TOOLS MADE FOR SMARTER BUILDERS.
