UTILITY STAPLE STARTER

Designed to hold and dispense utility staples to install ground wire to utility poles. Use the stapler to get the staple started on the pole quickly and safely.

## SAFELY START STAPLES WITH NO DROPS AND A SAFER JOBSITE

Top loading for quick staple reloads and less dropped staples

Durable, lightweight steel and aluminum construction for optimal performance

Jam release to remove bent staples

Built-in ruler provides an easy way to measure spacing of staples

Bottom stop to prevent driving staples too deep

D-ring for hanging and storage

- **Heavy-duty, staple starter** designed for utility applications

- Staple holder **automatically loads** the next staple to finish the job faster

- **Holds up to 35-40 staples –** enough to finish one pole installation

COLLATED STAPLES FOR QUICK, EFFICIENT INSTALLATION

- Staples feature a hybrid design that **fits all ground wire sizes and ground molding** reducing the number of staples needed to carry

- **Staples collated into packs of 15** to minimize loading time

- **Steel construction** for durability

- Total case size of **480 staples**
